

Distinguished alumnus Professor Sai Kee Yeung named AMS Fellow 2020

Our distinguished alumnus Professor Sai-Kee Yeung of Purdue University has been elected as a Fellow of the American Mathematical Society (2020) for his contributions to complex differential geometry, combining differential-geometric, complex-analytic and algebro-geometric techniques (<http://www.ams.org/profession/ams-fellows/new-fellows>).

Professor Yeung graduated from Department of Mathematics, HKU in 1985. He then obtained his Ph.D. degree from Columbia University in 1989 under the direction of Professor Ngaiming Mok and was a Sloan Fellow at MIT before joining Purdue University as an Assistant Professor.

Professor Yeung is a regular visitor of our Department and has been giving many lectures in our Geometry Group activities for the past two decades.
