Is it difficult to learn abstract algebra?

What can be done about it?

by

Professor M.K. Siu

Department of Mathematics

The University of Hong Kong

on Friday, March 8, 2002 at 4:00 p.m.

in Room 517, Meng Wah Complex, HKU

Abstract

The speaker will share with the audience some of his views and experience on the learning and teaching of abstract algebra (part of which may apply to the teaching and learning of mathematics in general). It is hope that the talk will stimulate discussion about learning and teaching of mathematics among teachers as well as among students.
